PROFESSIONAL SUMMARY

Full-stack developer with nearly 3 years of experience building and maintaining web and mobile applications, REST APIs, and enterprise integrations. Combines hands-on software development with more than a decade in IT infrastructure and operations, bringing an end-to-end understanding of users, processes, data, and production environments. Currently leading the technical development of PSICOAPOYO, a clinical platform built with Next.js, TypeScript, PostgreSQL, and Supabase.

TECHNICAL SKILLS

Backend: Node.js, PHP, REST APIs, SQL · Frontend: Next.js, React, Svelte, TypeScript, JavaScript · Data & cloud: PostgreSQL, MySQL, Supabase, Firebase, Vercel · Engineering: RLS, RBAC, Git, GitHub, CI/CD, integrations, testing, and production troubleshooting.

PROFESSIONAL EXPERIENCE

2026-PRESENT · INDEPENDENT FULL-STACK DEVELOPER / TECHNICAL LEAD

PSICOAPOYO — Clinical management platform

- Designing and developing a clinical platform with Next.js, React, TypeScript, PostgreSQL, and Supabase.
- Implemented role-based access, RLS, auditing, informed consent, scheduling, clinical records, intake forms, and SOAP notes.
- Manage SQL migrations, RPCs, QA, CI/CD, and Vercel deployments while coordinating directly with the client and end users.

SEP 2023-JUN 2026 · FULL-STACK DEVELOPER · CEREZO SOFTWARE

- Developed and maintained enterprise systems in SuiteCRM, PHP, and MySQL for customer service, inventory, orders, and invoicing.
- Delivered features for a Svelte/TypeScript mobile application used in production for two years.
- Built REST APIs and integrations with electronic invoicing and external services; supported deployments and production incidents.

NOV 2011-NOV 2022 · BUSINESS ANALYST / IT INFRASTRUCTURE & OPERATIONS · L'ORÉAL

- Administered infrastructure, networks, and servers and coordinated support and incidents across Argentina, Chile, and Uruguay.
- Gathered user requirements, improved processes, and contributed to regional technology initiatives.

ADDITIONAL PROJECT

Soledad Cedres Chiropractic: booking platform built with React, TypeScript, Firebase, Vercel Functions, Mercado Pago, automated notifications, scheduling, administration, and time-slot blocking.

EDUCATION & LANGUAGES

Hack Academy (2023): Full-Stack Developer, intensive program with 600+ hours of hands-on training.

ORT University Uruguay: Technical Degree in Operating Systems and Networking (2013) · Technical Degree in Electronics and Computer Systems (2012).

Languages: Spanish — Native · English — Advanced spoken and written proficiency.
