PROFILE

Backend / Fullstack Developer with experience in enterprise system development, APIs, and cross-platform integrations.

I have over 12 years of previous experience in IT infrastructure, support, and operations, which allows me to understand the complete functioning of systems in production.

Currently, I work on developing and improving enterprise management systems, integrating CRMs with external services, and developing mobile applications connected to APIs.

I specialize in backend development with JavaScript/Node.js, API design, and troubleshooting complex systems.

EDUCATION

- **Hack Academy - 2023 - Full Stack Developer:**
Extremely hands-on, 3-month, full-time educational program where I spent over 600 hours hands-on with Node.js, React.js, SQL, MongoDB, and Git
